

**COURSE DESIGNER: Rocky Perillo**

The diagram illustrates the layout for Stage 4 of the USPSA competition. The stage is a rectangular area with a blue floor. The layout includes:

- Barriers:** Blue rectangular barriers are positioned around the stage. A long barrier runs along the bottom edge, with a shorter section on the left. A vertical barrier is on the right side, and a horizontal barrier is in the center-right area.
- Targets:** Yellow rectangular targets are mounted on stands. There are five targets in total, positioned along the top and left walls.
- Barrels:** Black cylindrical barrels are placed at various points: one near the top-left target, one near the top-center target, one near the top-right target, one near the center barrier, and one near the bottom-left corner.
- Dimensions:** The stage is labeled with dimensions: 37' on the left side and 29' on the right side.
- Text:** The text "CSLKN USPSA" is written in the center, with "Stage 4" below it, and "20 Rounds" and "10 Paper" below that.

On the audible start signal, engage targets from within the shooting area.
